Gordon Moseley

Brooklyn, NY | 646-377-5325 | moseleygj@gmail.com | GitHub| LinkedIn | Portfolio

Professional Summary

Experienced IT professional with 15+ years in system administration, technical support, and incident management, specializing in Cybersecurity operations. Versed at implementing robust security measures, optimizing technology, and troubleshooting complex issues.

Certifications

- **ISC2 SSCP** (Systems Security Certified Practitioner)
- **Google Certified in Cyber Security**
- **Google IT Automation with Python Professional Certificate**
- **CompTIA: A+, Security+ CE, Linux+**

Technical Skills

- **Operating Systems:** Windows, macOS, Linux (RHEL, Ubuntu, CentOS)
- **Networking:** TCP/IP, DNS, DHCP, VPN, Firewalls, IDS, DLP
- **Languages & Scripting:** Python, Bash, SQL, JavaScript, C, HTML/CSS
- **Tools & Technologies:** VMware, Docker, Git, LAMP Stack, Active Directory (Azure AD), Microsoft Intune, JAMF, ServiceNow
- **Databases:** MySQL
- **Security Tools:** Antivirus, Endpoint Protection, Vulnerability Scanners, Penetration Testing Tools
- **Compliance & Frameworks:** HIPAA, ITIL, NIST
- **Cloud Platforms:** Azure

Professional Experience

IAM & Infrastructure | BlackRock(BeamLiving) -New York, NY OCT 2025 – Present

- **Network & Security Operations:** Resolve complex Tier II/III incidents, encompassing malware analysis, vulnerability assessments, and endpoint protection.
- **Identity & Access Management (IAM):** Orchestrate the full user lifecycle - including provisioning, account deactivation/removal,ACL,Encryption and MFA enforcement - via Azure Active Directory and Okta.
- **Unified Endpoint Management:** Secure and deploy device configurations across Windows, macOS, and Linux using Intune, and MDM.
- **Automation & Scripting:** Engineer PowerShell/Bash scripts to automate repetitive administrative tasks, system modifications, and process optimizations.
- **Data Integrity:** Enforce privacy and confidentiality standards through managed backup/recovery strategies and granular security permissions.
- **Operational Infrastructure:** Manage enterprise connectivity and support workflows using VPNs, ServiceNow, and advanced network troubleshooting.

IT Specialist | Princeton University - Princeton, NJ January 2023 – 2025

- Resolved complex Tier II/III network and security issues. Trained Help desk in advanced troubleshooting
- Managed incident detection, response, malware analysis, vulnerability assessments, data encryption, and endpoint protection. utilized crowdstrike.
- Administered user accounts, devices, and access (MFA, IAM) via Active Directory (Azure), Intune, and JAMF.
- Ensured data integrity, privacy, and confidentiality via backup, recovery, and security permissions.
- Conducted security awareness training, patch management, and IT asset inventory.
- Provided executive support for high-profile university offices (President, NASA, D.O.E. PPPL).

Computer Analyst | Brookdale Hospital / DELL - Brooklyn, NY March 2019 – December 2022

- Ensured 100% HIPAA compliance via security measure implementation and patch deployment on healthcare systems. Security: Nessus(Tenable), Qualys
- Managed client asset troubleshooting, upgrades, and deployments for healthcare solutions (Citrix, Epic, AllScripts)
- Met SLAs and executed service delivery via ServiceNow during the COVID-19 peak.

I.T. Vulnerability Analyst | AIG / DELL - New York, NY May 2014 – March 2019 (Contract)

- Analyzed penetration test; conducted design/security source code reviews (Java, PowerShell, ASP.NET).
- managed vulnerabilities; supported firewall, proxy, IDS/IPS, DLP, and vulnerability scanners.
- Managed global anti-virus/threat agents; formalized security policies using ITIL and NIST frameworks.

Help Desk Level III | U.S. Department of Labor - New York, NY March 2010 – September 2014

- Scripted process automation and reporting using SQL; managed network infrastructure, email, and file shares.

Help Desk | National Grid - New York, NY January 2009 – December 2009 (Contract)

- Provided remote desktop assistance (LAN/VPN) via Active Directory; supported mail migration and troubleshooting.

Apple MacOS System Administrator | Data Velocity - New York, NY October 2008 – December 2008 (Contract)

- Maintained small business servers, configured secure VPNs, and scripted task automation for Windows/UNIX/Linux clients.

Information Systems Technician | U.S. NAVY - Mayport, FL June 2006 – September 2008

- Executed disaster recovery strategies; automated backup and advanced data protection measures.
- Performed comprehensive vulnerability/threat analyses; managed risk mitigation and resolved network security issues.
- Oversaw data migration/integration across Windows, Linux, and macOS platforms, implementing security controls for sensitive data.

Education

- **Electrical Engineering** | University of Florida – Florida 2014
- **AOS in Computer Programming & Info Systems** | ASA - Brooklyn, NY 2004

Awards

- Above and Beyond Award, Princeton University
